Experience

CS Erectors • BIM Lead • 2023–Present

BIM and preconstruction professional specializing in glazing and facade systems, with experience developing accurate 3D models, coordinating project information, and supporting design, estimating, and field planning. Responsibilities include managing BIM and drafting standards, creating technical proposals, producing logistics and waterproofing diagrams, coordinating embed and clip layouts, and supporting supplier reviews. Skilled in developing Dynamo, Excel macro, and AutoLISP tools to improve drafting and modeling workflows, while also supporting ACC management, Bluebeam sessions, presentations, laser measurements, 3D printing, and project documentation.

- Introduced 3D modeling workflows at CS Erectors by creating project-specific models for every bid and supporting those models through preconstruction, coordination, and operations. Models were used for estimating, design assist, shop drawings, BIM coordination, field planning, and quantity takeoffs.
- Produced company-wide graphical and technical content, including logistics plans, bid interview presentations, technical proposals, waterproofing standards, and professional photography of completed work.
- Developed over 50 custom Dynamo, AutoLISP, and VBA macro tools to automate and improve Revit, AutoCAD, and Excel workflows across modeling, drafting, scheduling, and takeoff processes.

Walters & Wolf • Virtual Design Modeler • 2020–2023

As a key member of the preconstruction team, I helped create accurate 3D Revit models used to quantify materials and labor for reliable glass and metal panel facade estimates. This work gave me a strong understanding of curtain wall design and manufacturing workflows. I also managed the modeling scope for my projects, finalized drafts, and coordinated design and engineering changes efficiently.

- Assisted in securing numerous multimillion-dollar construction projects for Walters & Wolf
- Developed a comprehensive library of adaptive generic models, serving as a versatile resource throughout the entire project lifecycle, from preconstruction to production and manufacturing
- Revamped and modernized bid forms and sales presentation templates, elevating the quality and their effectiveness

Skills

Revit
Dynamo
Python Scripting
AutoCAD
AutoLisp
Revu Bluebeam
BIM360 / ACC
Rhino
Autodesk Inventor
Bentley Microstation
Solidworks
Microsoft Excel
VBA Macros
Adobe Illustrator
Adobe Indesign
Adobe Photoshop
Photography
Microsoft Office
3D Printing
Leica Laser Scans
Logistics Planning
Revizto
Navisworks
Construction Documentation
Technical Proposals
Shop Drawing Creation
Quantity Takeoffs
Design Assist
Bid Proposal Presentations

Education

San Francisco State University
2013 – 2018

BS in Industrial Design
Minor in English Literature
